

SOUTHWEST FLORIDA WATER MANAGEMENT DISTRICT

FDOT MITIGATION PLAN October 24, 2000

INTRODUCTION

This mitigation plan has been developed by the Southwest Florida Water Management District (SWFWMD) to provide regional, long range mitigation planning for Florida Department of Transportation (FDOT) projects in accordance with Section 373.4137, Florida Statutes. The following information lists the FDOT project, proposed construction dates, wetland impact acreage, associated mitigation projects, and revisions from the 1999 plan.

The FDOT has provided an annual statewide inventory of projected construction impacts to wetlands since 1996. In July, 2000 the FDOT identified projected impacts for construction projects planned in Fiscal Years 2000/01 through 2004/05 and information regarding modifications to previously identified projects. In addition, advance notice was provided for certain large projects scheduled beyond this planning horizon so that appropriate mitigation projects can be developed. For each FDOT project, information was provided regarding the acreage and type of wetland impacts anticipated from construction.

Based on the information provided by the FDOT, mitigation projects were included in this plan to offset those impacts anticipated within the SWFWMD geographic area. Proposed mitigation projects are intended to meet State (ERP) and Federal (Section 404) permitting criteria pertaining to wetland mitigation. These mitigation projects are required to adequately compensate for the loss of the associated wetland impacts with similar enhanced, restored and created habitat functions and values.

Selection of mitigation projects was conducted in consultation with staff from the Florida Department of Environmental Protection, Florida Department of Transportation, Florida Fish & Wildlife Conservation Commission, U.S. Army Corps of Engineers, U.S. Fish and Wildlife Service, and the National Marine Fisheries Commission. Other interested agencies and the public, including representatives of private mitigation banks, also provide input during the selection process.

It should be noted this plan does not represent approval from the SWFWMD or any of the participating regulatory agencies for the wetland impacts identified in the inventory or any other impacts that may be related to the inventoried FDOT projects. These agencies reserve their authority to fully evaluate permit applications for each of the FDOT construction projects according to applicable rules at the time of application.

This mitigation plan is not specifically designed to offset impacts to any State or Federally-listed species or any secondary impacts that may be incurred as a result of road construction. However, this does not mean the mitigation projects included herein could not be used for such purposes if subsequent analysis determined a mitigation project was suitable and sufficient mitigation was available to meet this requirement and need.

This plan attempts to provide enough flexibility to account for any subsequent revisions that may be necessary to address specific permitting needs of the FDOT. Annual updates will be made to add projects planned for each new year and to revise those projects already inventoried. Revisions will be required to address changes to construction start dates, inventoried projects, or wetland impact information. Revisions may also be necessary to provide any additional mitigation required by federal regulatory agencies.

WETLAND IMPACTS

Since the inception of the FDOT mitigation program in 1996, FDOT Districts 1 (Bartow), 5 (Deland), 7 (Tampa), and Turnpike (Orlando) have identified 75 construction projects with wetland impacts in the SWFWMD through at least 2005. Distributed over 11 drainage basins and covering 16 counties, the total wetland impact acreage projected by FDOT during this period is approximately 280 acres. Figure 1 locates the basins within the SWFWMD, Figures 2 and 3 depict the FDOT project locations relative to those basins, and summarizes these projected impacts. Detailed impact information is provided in Table 1. Impact information is also provided in a basin-by-basin summary of impacts and mitigation.

This year's plan shows a 36% increase (48 to 75) in FDOT projects and 29% increase (200 to 280 acres) of proposed wetland impacts from the 1999 Inventory. For the area within the SWFWMD, all but a few of these new improvement projects are proposed for high traffic facilities in Hillsborough and Pinellas Counties.

MITIGATION PROJECTS

The District mitigation plan incorporates mitigation projects developed by District staff, particularly the Land Resources Department and the Surface Water Improvement & Management Section (SWIM). Mitigation nominations are also submitted from other public agencies such as the Department of Environmental Protection (FDEP), County Governments, and private mitigation banks. These potential mitigation options are extensively reviewed by the previously mentioned environmental agencies as to whether they appropriately mitigate for the loss of the wetland functions associated with the FDOT construction projects. Where the mitigation plans require earthwork, construction plans are designed and agency approved through the permitting process.

The majority of the proposed wetland impacts added to this year's plan will be compensated through expansion of an existing SWIM project (Gateway Restoration), others by the addition of another SWIM project (Tappan Tract) and a Hillsborough County project (Cypress Creek Preserve, West).

Also of note is the selection of two mitigation projects for proposed wetland impacts (Withlacoochee River Basin) that were deferred from the 1999 Inventory. There are many public lands within this basin, but the mitigation opportunities for the majority are not warranted since the sites already provide good habitat conditions, or the minor restoration requirements are funded through other sources. However, the substantial restoration and enhancement opportunities associated with the recently SWFWMD-

acquired Hampton Tract (7,640-acres) and within the Withlacoochee State Forest–Baird Tract (11,000 acres) offers exceptional and noteworthy opportunities to enhance & restore wetland habitats within a mosaic of other native habitats.

There are 20 selected mitigation projects, 3 more than within the 1999 Mitigation Plan. Along with the 4 new projects referenced above, 2 additional new projects include a 235-acre parcel acquisition and management (Serenova Extension) adjacent to several thousand acres of existing SWFWMD property and a restoration project along the SWFWMD's northern district boundary (Fish Prairie). The following three proposed mitigation projects are removed from consideration:

Upper Hillsborough, Tri-Ditch (SW 21) - After 2 years of hydrologic evaluation, it was determined the proposed earthwork activity associated with this proposed project on SWFWMD property would not significantly restore surficial water table conditions due to groundwater drawdown associated with long-term, off-site mining activity. The proposed mitigation requirements for the three roadway projects will be compensated through the new Hillsborough County Parks site, Cypress Creek Preserve, West (also referred to as the Jennings Tract, SW 61).

Tiger Creek Preserve (SW 48) – This site was further evaluated to determine the potential ecological benefit associated with the removal of two minor fill roads and culverts across forested wetlands. With the groundwater seepage associated with several feet of underlying muck soils, it was determined the minor fill is not restricting ground or surficial water flow. In addition, the roads are less than 10 ft. wide so construction equipment access and mobility would result in some wetland impacts. As a result, in a joint decision with The Nature Conservancy (landowner of Tiger Creek Preserve), it was determined to remove the proposed project from consideration. After final design of the roadway project that proposed mitigation at Tiger Creek, it was determined that no wetland impacts will occur so another mitigation option was not necessary.

Cockroach Bay (SW 56) – Cockroach Bay (SWIM) includes a few thousand acres of fresh and salt water wetland creation, restoration, and enhancement. A portion of Cockroach Bay was proposed to mitigate for freshwater wetland impacts within the Tampa Bay Drainage Basin.

After additional evaluation of groundwater salinity levels, it was determined at this time that the available acreage for freshwater wetland creation will probably not accommodate the requirements of all entities proposing mitigation there. After additional site evaluation and design over the next year, that condition may change. For now, the mitigation decision for the associated FDOT wetland impacts will be deferred until next year's plan.

As noted on Table 3, to date the mitigation projects propose a cumulative 4583 acres of various mitigation methods to compensate for a total 234 acres of proposed wetland impacts associated with FDOT construction improvements. Figure 4 locates the selected mitigation projects relative to their associated basin. The mitigation project names are color-coded to match the proposed wetland impacts within the associated basins depicted of Figures 2 & 3. A basin-by-basin summary of impacts and mitigation projects

is provided below. Table 2 summarizes the mitigation project funding and Table 3 lists the various mitigation methods proposed for each mitigation project. Information (narratives, location maps, aerials, designs) concerning the mitigation projects are provided in Appendix 1.

MODIFICATIONS TO PREVIOUS MITIGATION PLANS

This plan also includes modifications to previous mitigation plans. Modifications proposed in this plan are required to replace previously identified mitigation projects with more suitable or cost-effective projects, adjust projected impact acres to account for design revisions by FDOT, and to reconcile projected versus permitted impact acres following issuance of state and federal wetland permits for construction. Modifications of the FDOT projects and mitigation activities are so noted where they occur in the plan.

REPAYMENT OF ADVANCE FUNDING

Pursuant to Section 373.4137, F.S., the FDOT provided \$12 million in advance mitigation funding. These funds were distributed statewide to various projects listed in each of the Water Management Districts= SWIM plans and to specific aquatic and exotic plant control projects. To the extent these projects offset the wetland impacts identified in the inventory, the FDOT can receive mitigation credit for them, thus offsetting a portion of the advance funding. Of the \$12 million distributed statewide, the SWFWMD received \$1.9 million for SWIM projects. It is expected that savings from cost-effective mitigation projects (i.e. projects costing less than the funding available based on impact acreage) will also be credited toward the advance funding.

As noted on Table 2, upon approval of this mitigation plan, the SWFWMD will be able to contribute approximately \$6.5 million to offset the statewide \$12 million advance funds. Any questions, comments, or suggestions on the FDOT Mitigation Plan process, associated ERP permitting, individual mitigation projects, or mitigation banking can be directed to Mark Brown at:

Hillsborough River Basin

Project: Interstate 4, County Line to Memorial Blvd., Sec. 1

WPI# 7113951 **FM#** 2012081
Date: October, 1997
Impacts: 13.55 acres
Mitigation: Upper Hillsborough – US 301 Project (SW 55)
Status: Previous plan had additional wetland impacts proposed to be mitigated at the US 301 site, but have been allocated elsewhere to minimize mitigation requirements at this site.

Project: SR 54 - US 41 to Cypress Creek
WPI# 7115981 **FM#** 2563431
Date: October, 2000
Impacts: 14.14 acres
Mitigation: Lake Thonotosassa Restoration Project (SW 34)
Status: Roadway construction delayed from summer to fall, 2000. Mitigation site has been constructed & planted in 1999, currently in maintenance & monitoring period.

Project: US 41 - Bell Lake to Tower Rd.
WPI# 7115951 **FM#** 2563151
Date: April, 2001
Impacts: 1.10 acres (decreased 0.7 acres from 1999)
Mitigation: Hillsborough River Corridor (SW 63)
Status: Previously proposed to be mitigated at Lake Thonotosassa,

Project: Bruce B. Downs Bike Path (Amberly Dr. to Hunter's Green)
WPI# 7123606 **FM#** 2578071
Date: October, 1999
Impacts: 0.5 acres
Mitigation: Jennings Tract, Cypress Ck. Preserve (West) (SW 61)
Status: Mitigation transfer from Upper Hillsborough – US 301

Project: Interstate 4 B W. of Memorial Blvd. To W. of US 98 (Section 2)
WPI# 1147955 **FM#** 2012171
Date: October 2001
Impacts: 2.08 acres
Mitigation: Jennings Tract, Cypress Ck. Preserve (West) (SW 61)
Status: Mitigation transfer from Upper Hillsborough – US 301

Project: SR 39, Blackwater Creek Bridge Replacement
WPI# 7113773 **FM#** 2555361
Date: July, 2001
Impacts: 2.10 acres
Mitigation: Jennings Tract, Cypress Ck. Preserve (West) (SW 61)
Status: Impact increases 0.60 acres, transfer from UH – US 301 (SW 55)

Hillsborough River Basin (cont=d)

Project: SR 52, US 41 to CR 581
FM# 2563871
Date: September 2002
Impacts: 0.2 acres

Mitigation: Jennings Tract, Cypress Ck. Preserve (West) (SW 61)
Status: New Project

Project: SR 56 – SR 54 to Bruce B. Downs Blvd.
WPI# 7147617 **FM#** 2563871
Date: July, 1999
Impacts: 5.3 acres
Mitigation: 4.3 acres (Jennings Tract), 1.0 Acre (Hills. River Corridor, SW63)
Status: New Project, addit. impacts assoc. with roadway construction

Project: Bruce B. Downs Bikepath (Tampa City Limits to Amberly Drive)
FM# 2578072
Date: September, 2002
Impacts: 0.2 acres
Mitigation: Jennings Tract, Cypress Ck. Preserve (West) (SW 61)
Status: New Project

Project: SR 678 (Bearss Avenue) Florida Ave. to Nebraska
FM# 2558591
Date: November 2002
Impacts: 0.1 acres
Mitigation: Jennings Tract, Cypress Ck. Preserve (West) (SW 61)
Status: New Project

Project: Alexander Street, US 92 to Interstate 4
FM# 2578391
Date: May 2004
Impacts: 0.90 acres
Mitigation: Jennings Tract, Cypress Ck. Preserve (West) (SW 61)
Status: New Project

Project: Alexander Street, On-Ramp to Westbound Interstate 4
FM# 2584491
Date: June 2004
Impacts: 2.30 acres
Mitigation: Jennings Tract, Cypress Ck. Preserve (West) (SW 61)
Status: New Project

Hillsborough River Basin (cont=d)

Project: SR 93 (Interstate-275), US 41 to Pasco County Line
FM# 2584131
Date: June 2006
Impacts: 0.39 acres

Mitigation: Jennings Tract, Cypress Ck. Preserve (West) (SW 61)
Status: New Project

Kissimmee Ridge Basin

Project: US 27 - Lake Glenada to Hal McRae Rd.
WPI# 1112576 **FM#** 1945101
Date: September 2001
Impacts: 0.39 acres
Mitigation: Reedy Creek Mitigation Project (SW 49), No revisions from 1999

Project: US 17 (SR 35) Wallingford Rd. to Bellview Rd.
WPI# 1118580 **FM#** 1976881
Date: August, 2001
Impacts: No impacts, 0.50 acres in 1999 plan
Mitigation: Project will have no wetland impacts
Status: Project removed from the Inventory

Lower Coastal Basin

Project: SR 789 - Ringling Causeway Bridge
WPI# 1119232 **FM#** 1979421
Date: June, 2001
Impacts: 0.46 acres, decreased 0.22 acres from 1999 plan
Mitigation: Quick Point Nature Preserve (SW 38)

Project: US 41 (SR 45) Shamrock to Venice Avenue
WPI# 119317 **FM#** 1980221
Date: October, 2001
Impacts: 0.07 acres
Mitigation: Quick Point Nature Preserve (SW 38)
Status: No revisions from 1999 plan

Project: US 41 Bus. (SR 45) - Venice Ave. to Bypass
WPI# 1119295 **FM#** 1980051
Date: September, 2001
Impacts: 0.11 acres
Mitigation: Quick Point Nature Preserve (SW 38)
Status: Impact decreased 0.36 acres from 1999 plan

Manatee River Basin

Project: US 301 (Ellenton) B 60th Ave. to Erie Rd.
WPI# 1115399 **FM#** 1960581
Date: October, 2000
Impacts: 0.59 acres
Mitigation: Terra Ceia (SW 50)

Status: Impact decreases 0.28 acres from 1999 plan

Project: SR 64 - CR 675 to East of Myakka River Bridge
WPI# 1115478
Date: June, 2000
Impacts: 0.50 acres
Mitigation: Terra Ceia (SW 50)
Status: No revisions from 1999 plan

Myakka River Basin

Project: SR 776 B CR 771 to Willow Bend Rd.
WPI# 1110148 **FM#** 1937941
Date: July 1999
Impacts: 11.0 acres
Mitigation: Cattle Dock Point (8.9 ac.), (SW 31)
 Little Pine Island Mitigation Bank (2.1 ac.) (SW 52)
Status: No revisions from 1999 plan

Project: SR 776 B E. of Sunnybrooke to W. of CR 771
WPI# 1110167 **FM#** 1938131
Date: May, 2001
Impacts: 0.25 acres
Mitigation: Myakka River State Park (SW 51)
Status: No revisions from 1999 plan

Project: SR 72 B Deer Prairie to Big Slough
WPI# 1119303 **FM#** 1980131
Date: September 1999
Impacts: 0.87 acres
Mitigation: Myakka River State Park (SW 51)
Status: No revisions from 1999 plan

Project: SR 72 B Big Slough to Desoto County line
WPI# 1119215 **FM#** 1979251
Date: January 1999
Impacts: 1.49 acres
Mitigation: Myakka River State Park (SW 51)
Status: No revisions from 1999

Ocklawaha River Basin

Project: SR 40 B CR 225a to SW 52nd Ave
WPI# 5113632
Date: December, 2004
Impacts: 0.11 acres
Mitigation: Fish Prairie Restoration (SW 58)
Status: Mitig. transfer from Lk. Apopka Marsh Flow-Way Project (SJRWMD)

Project: SR 500 - Levy Co. Line to CR 326
WPI# 5113511
Date: January 2002
Impacts: 7.01 acres
Mitigation: Fish Prairie Restoration (SW 58)
Status: Mitigation deferred from 1999 Plan, no previous nominations

Project: SR 500 B CR 464 to CR 225a
WPI# 5113549
Date: September 1999
Impacts: 1.09 acres
Mitigation: Fish Prairie Restoration (SW 58)
Status: Transfer from Lk. Apopka Marsh Flow-Way Project (SJRWMD)

Peace River Basin

Project: I-4 East of US 98 to East of SR 33 (Section 3)
WPI# 1147952 **FM#** 2012091
Date: March 2001
Impacts: 1.71 acres
Mitigation: Tenoroc/Saddle Creek Restoration (SW 47)
Status: No revisions from 1999 plan

Project: SR 70 - Manatee Co. Line to Peace River Relief Canal
WPI# 1110457 **FM#** 1938891
Date: October 2001
Impacts: 1.0 acres
Mitigation: Boran Ranch Mitigation Bank (SW 53)
Status: No revisions from 1999 plan

Project: Ft. Green/Ona Rd. B SR 62 to N. of Vandolah Rd. (Seg. 1)
WPI# 1121259 **FM#** 1986401
Date: May, 1999
Impacts: 2.08 acres
Mitigation: Boran Ranch Mitigation Bank (SW 53)
Status: No revisions from 1999 plan

Peace River Basin (cont=d)

Project: SR72 - Sarasota County Line to SR 70
WPI# 1110453 **FM#** 1938890
Date: October 2000
Impacts: 1.19 acres
Mitigation: Boran Ranch Mitigation Bank (SW 53)
Status: No revisions from 1999 plan

Project: US 17 (SR 35) B SR 64 to North of Peace River Bridge
WPI# 1111286 **FM#** 1941021
Date: February 2001
Impacts: 2.3 acres
Mitigation: Boran Ranch Mitigation Bank (SW 53)
Status: No revisions from 1999 plan

Project: SR 540 - Thornhill Rd. to Recker Hwy.
WPI# 1118367 **FM#** 1974751
Date: July 2000
Impacts: 5.87 acres
Mitigation: Tenoroc/Saddle Creek Restoration Project (SW 47)
Status: No revisions from 1999 plan

Project: SR 540(Cypress Gardens) - 9th St. to Overlook
WPI# 1118363 **FM#** 1974711
Date: November 2000
Impacts: 0.41 acres
Mitigation: Tenoroc/Saddle Creek Restoration Project (SW 47)
Status: No revisions from 1999 plan

Project: US 17 (SR 35) - North of CR 74 to CR 764
WPI# 1110145 **FM#** 1937911
Date: October 2000
Impacts: 0.54 acres
Mitigation: Boran Ranch Mitigation Bank (SW 53)
Status: No revisions from 1999 plan

Project: Trabue Harborwalk Bike Path
WPI# 1120075 **FM#** 1984711
Date: October 2000
Impacts: 0.16 acres
Mitigation: Little Pine Island Mitigation Bank (SW 53)
Status: No revisions from 1999 plan

Peace River Basin (cont=d)

Project: CR 633 (Ft. Green/Ona Rd.) B Vandolah Rd. to N. of Vandolah Rd.
 (Segment 2)
WPI# 1121257 **FM#** 1984711
Date: October 2000
Impacts: 10.82 acres
Mitigation: Boran Ranch Mitigation Bank (SW 53)
Status: Wetland impact decreased 4.02 acres from 1999 plan

Project: CR 633 (Ft. Green/Ona Rd.) B SR 64 to Vandolah Rd. (Segment 3)
WPI# 1121256 **FM#** 1986371
Date: October 2003
Impacts: 5.23 acres
Mitigation: Boran Ranch Mitigation Bank (SW 53)
Status: Wetland impact decreased 0.67 acres from 1999 plan

Project: US 17 (SR 35) B CR 764 South to CR 764 North
WPI# 1110152 **FM#** 1937981
Date: October 2002
Impacts: 3.47 acres
Mitigation: Boran Ranch Mitigation Bank (SW 53)
Status: No revisions from 1999 plan

Project: US 98, Mount Zion Church Rd. to US 27
WPI# 1118424 **FM#** 1975321
Date: October 2001
Impacts: 0.50 acres
Mitigation: Tenoroc/Saddle Creek Restoration (SW 47)
Status: No revisions from 1999 plan

Project: I-75 Widen Bridge over Peace River
FM# 4046971
Date: January 2001
Impacts: 3.82 acres
Mitigation: Deferred until 2001 plan
Status: Wetland impact decreased 1.0 acres, no mitigation determined in 1999, but Little Pine Island was nominated

Project: US 27 – Towerview Rd. to SR 540
FM# 1975331
Date: October 2002
Impacts: 7.00 acres
Mitigation: Nominated:Clear Springs Mit. Bank, Boran Ranch Mit. Bank
Status: New Project; mitigation decision deferred until 2001 plan

Peace River Basin (cont=d)

Project: US 17 (SR 35) Peace River to Tropicana Rd.
WPI# 1111277 **FM#** 1940931
Date: October 2002
Impacts: 4.82 acres
Mitigation: Nominated:Clear Springs Mit. Bank, Boran Ranch Mit. Bank
Status: New Project; mitigation decision deferred until 2001 plan

Tampa Bay Basin

Project: SR 676 - Maritime Blvd. To SR 60
WPI# 7113975 **FM#** 2557341
Date: January, 2001
Impacts: 1.5 acres
Mitigation: Gateway Restoration (SW 45)
Status: Wetland impact increases 0.2 acres, mitigation portion proposed for Cockroach Bay Restoration has been transferred so all impacts will be mitigated at Gateway.

Project: SR 55 - Drew St. to Railroad
WPI# 717045 **FM#** 2569571
Date: September 2001
Impacts: 0.50 acres
Mitigation: Previous mitigation, Cockroach Bay Restoration (SW 56)
Status: Mitigation decision deferred until 2001 plan

Project: Interstate 275 - Roosevelt to Big Island Gap
WPI# 7147874 **FM#** 2588701
Date: September 2001
Impacts: 7.70 acres
Mitigation: Gateway Restoration (SW 45)
Status: Wetland impact decreased by 2.30 acres, some mitigation has been transferred from Cockroach Bay (SW 56).

Project: SR 679 (Bayway) B Bunces Pass Bridge #150
WPI# 7116992 **FM#** 2569051
Date: February 2000
Impacts: 0.60 acres
Mitigation: Gateway Restoration (SW 45)
Status: Impact increases by 0.08 acres

Project: SR 60, Clearwater Harbor Bridge Replacement
FM# 2570931
Date: December 2001
Impacts: 0.20 acres
Mitigation: Gateway Restoration (SW 45), New Project

Tampa Bay Basin (cont'd)

Project: Gunn Hwy., S. of Wayne Rd. to N. of Wayne Rd.
FM# 4037491
Date: August 2001
Impacts: 0.2 acres
Mitigation: Nominations – Hills. Co. Parks (ELAPP), Tampa Bay Mit. Bank, Cockroach Bay Restoration (SW 56)
Status: New Project, mitigation decision deferred to 2001

Project: US 19, CR 816 (Alderman) to SR 582 (Tarpon)
FM# 4037701

Date: February 2002
Impacts: 0.10 acres
Mitigation: Gateway Restoration (SW 45)
Status: New Project

Project: Interstate-75, SR 60 to Southbound Off-Ramp
FM# 2584241
Date: July 2002
Impacts: 1.20 acres (Anticipated impact decrease upon final design)
Mitigation: Cockroach Bay Restoration (SW 56)
Status: New Project

Project: SR 682 (Bayway), US 679 to West Toll Plaza
FM# 2569031
Date: July 2003
Impacts: 5.60 acres (Anticipated impact decrease upon final design)
Mitigation: Gateway Restoration (SW 45) **Status:** New Project

Project: SR 400 (Interstate – 4), 14th Street to 50th Street
FM# 2584011
Date: October 2003
Impacts: 7.00 acres (Anticipated impact decrease upon final design)
Mitigation: Nominated: Hills. Co. Parks (ELAPP), Tampa Bay Mitig. Bank, Cockroach Bay Restoration (SW 56)
Status: New Project, mitigation decision deferred to 2001

Project: US 19, Coachman Rd. to Sunset Point
FM# 2568881
Date: November 2002
Impacts: 0.40 acres
Mitigation: Nominated: Hills. Co. Parks (ELAPP), Tampa Bay Mitig. Bank, Cockroach Bay Restoration (SW 56)
Status: New Project, mitigation decision deferred to 2001

Tampa Bay Basin (cont'd)

Project: US 19 – Pasco County Line to SR 580 (sidewalk)
FM# 4051681
Date: February 2003
Impacts: 0.50 acres
Mitigation: Gateway Restoration Project (SW 56) (0.1 Ac.)
 Nominated: Hills. Co. Parks, Tampa Bay Mitig. Bank, Cockroach Bay (SW 56) for 0.4 Acres
Status: New Project, mitigation decision for the 0.4 acres of freshwater wetland impacts will be deferred until 2001 plan

Project: SR 686 (Roosevelt) at 49th Street
FM# 4062531
Date: October 2004
Impacts: 0.10 acres
Mitigation: Gateway Restoration (SW 45)
Status: New Project

Project: SR 60, Cypress St. to Fish Creek
FM# 2557031
Date: November 2004
Impacts: 14.70 acres
Mitigation: Tappan Project (SW 62) (9.5 Ac.) for saltwater impacts
 Nominated: Hills. Co. Parks, Tampa Bay Mitig. Bank,
 Cockroach Bay Restoration (SW 56) for 5.2 Ac.
Status: New Project, mitigation decision for the 5.2 acres of freshwater
 wetland impacts will be deferred to 2001 plan

Project: Interstate-275, Howard Franklin to Himes Avenue
FM# 2583981
Date: November 2005
Impacts: 2.20 acres
Mitigation: Nominated: Gateway Tract (SW 49)
 Cockroach Bay Restoration (SW 56)
Status: New Project, mitigation deferred until 2001 when more specific
 wetland impact information is provided.

Project: SR 60, Courtney Campbell to Fish Creek
FM# 2556301
Date: April, 2007
Impacts: 13.00 acres
Mitigation: Gateway Restoration (SW 45)
Status: New Project

Upper Coastal Basin

Project: SR 54 - Mitchell to Gunn Hwy.
WPI# 7115974 **FM#** 2563361
Date: October 2002
Impacts: 9.60 acres
Mitigation: Anclote Parcel (SW54)
Status: Wetland impact decreased 0.69 acres from 1999 plan,
 mitigation site was acquired in 2000

Project: US 41 – SWFWMD Entrance Rd. to Powell Road
FM# 2548221
Date: August 2003

Impacts: 1.00 acres
Mitigation: Serenova Extension (SW 60)
Status: New Project

Project: US 98 – Hernando Co. Line to US 19
Date: September 2002
FM# 2571741
Impacts: 1.40 acres
Mitigation: Nominated: Weeki Wachee Preserve (North)
Status: New Project, mitigation decision deferred until 2001 plan

Project: SR 688 (Ulmerton Road), Oakhurst Rd. to 119th Street
FM# 2570501
Date: March 2004
Impacts: 0.20 acres
Mitigation: Serenova Extension (SW 60)
Status: New Project

Project: SR 52 – Moon Lake to Suncoast Parkway
FM# 2584491
Date: June 2004
Impacts: 7.30 acres
Mitigation: Nominated: Weeki Wachee Preserve (South)
Status: New Project, mitigation decision deferred until 2001

Withlacoochee River Basin

Project: SR 44 B CR 470 to County Line
WPI# 7119003 **FM#** 2571641
Date: December 2002
Impacts: 13.60 acres
Mitigation: Baird Tract (SW 64), nominated in the 1999 plan
Status: Mitigation project decision was deferred in the 1999 plan

Withlacoochee River Basin (cont=d)

Project: SR 44 B US 41 to CR 470
WPI# 7119002 **FM#** 2571631
Date: November 2001
Impacts: 4.80 acres
Mitigation: Baird Tract (SW 64), nominated in the 1999 plan
Status: Wetland impact decrease by 2.08 acres from 1999 plan, Mitigation project decision was deferred in the 1999 plan

Project: Interstate 4 B E. of US 98 to E. of SR 33 - (Section 3)
WPI# 1147947 **FM#** 2012091
Date: October 2001

Impacts: 13.85 acres
Mitigation: Hampton Tract (SW 59)
Status: Wetland impact increased by 1.75 acres from 1999 plan

Project: Interstate 4 B E. of SR 33 to E. of CR 559 - (Section 4)
WPI# 1147952 **FM#** 2012091
Date: November 2001
Impacts: 6.73 acres, impact acreage could decrease upon final design
Mitigation: Hampton Tract (SW 59)
Status: Mitigation project decision was deferred within the 1999 plan

Project: Interstate 4 - E. of CR 559 to E. of CR 557 - (Section 5)
WPI# 1147953 **FM#** 2012151
Date: November 2001
Impacts: 10.66 acres, impact acreage could decrease upon final design
Mitigation: Hampton Tract (SW 59)
Status: Mitigation project decision was deferred within the 1999 plan

Project: Interstate 4 B E. of CR 557 to W. of US 27 - (Section 6)
WPI# 1147954 **FM#** 2012161
Date: December 2001
Impacts: 12.71 acres, impact acreage could decrease upon final design
Mitigation: Hampton Tract (SW 59)
Status: Mitigation project decision was deferred within the 1999 plan

Project: Interstate -75 Lake Panasoffkee Bridge Widening
WPI# 548964 **FM#** 4063291
Date: November 2000
Impacts: 5.93 acres
Mitigation: Lake Panasoffkee Restoration (SW 57)
Status: Wetland impact increased by 1.33 acres from 1999 plan
