

Statement of Sources and Uses of Funds For the Six Months Ended March 31, 2013

The attached "Statement of Sources and Uses of Funds" statement is provided for your review. The financial statement provides summary-level revenues and balances (i.e., sources) and expenditures/encumbrances by program (i.e., uses).

The financial statement reports the financial activities for the first six months of fiscal year 2012-13, ended March 31, 2013, and compares actual results against the annual budget, with 50 percent of the fiscal year completed.

Revenues (Sources) Status:

- Overall, as of March 31, 2013, 89 percent of the District's budgeted revenues/balances have been recognized.
- As of March 31, 2013, the District has received \$89.5 million of ad valorem tax revenue representing 89 percent of the budget. This is in-line with the prior year sixth month collection rate of 89 percent for FY2011-12. The budget represents 96 percent of the tax levy based on the historical collection rate.
- Intergovernmental Revenues are recognized at the time related expenditures are incurred. For FY2012-13, \$6.2 million in revenues has been recognized, representing 17 percent of the budget. From year to year, the budgeted amount of intergovernmental revenue compared to the recognized amount can fluctuate for various reasons; projects can be in the planning stages and have not incurred a significant amount of expenditures, or anticipated projects may be canceled (e.g., cooperative funding projects).
- The FY2012-13 interest earnings budget was based on a 0.5 percent expected rate of return. For the six months ended March 31, 2013, the District earned 0.46 percent return on its investments. Interest earnings based on higher than anticipated invested funds and a slightly lower rate of return totaled \$1.3 million, representing 67 percent of the budget.
- License and Permit Fees consist of revenue from water use permits, environmental resource permits, water well construction permits, and water well construction licenses. Revenue recognized represents 44 percent of the budget as of March 31, 2013, slightly below budget.
- As of March 31, 2013, other revenue earned is 125 percent of budget. Each year, items that fall within the "Other" revenue category are budgeted conservatively due to the uncertainty of the amounts to be collected. For example, revenues from timber sales, hog hunts, and the sale of assets can vary significantly from year to year.
- Fund Balance consists of balance from prior years (budgeted for the current year) plus fund balance associated with the ad valorem funded encumbrances that rolled into the current year.

Expenditures (Uses) Status:

Overall, as of March 31, 2013, the District had obligated 79 percent of its total budget.

Summary of Expenditures by Program

This financial statement illustrates the effort to date for each of the District's six statutory program areas (Section 373.536(5)(e)4, Florida Statutes). A discussion of the expenditures by program follows.

- The **Water Resource Planning and Monitoring Program** includes all water management planning, including water supply planning, development of minimum flows and levels, and other water resource planning; research, data collection, analysis, and monitoring; and technical assistance (including local and regional plan and program review). Of the \$48.1 million budgeted for this program, the District has obligated 74 percent of the budget (21 percent expended and 53 percent encumbered).
- The **Land Acquisition, Restoration and Public Works Program** includes the development and construction of all capital projects (except for those contained in the Operation and Maintenance of Works and Lands Program), including water resource development projects/water supply development assistance, water control projects, and support and administrative facilities construction, land acquisition (i.e., Florida Forever program), and the restoration of lands and water bodies. Of the \$281.9 million budgeted for this program, the District has obligated 86 percent of the budget (6 percent expended and 80 percent encumbered). Because the majority of these program expenditures are incurred by cooperators and invoiced to the District for reimbursement, the majority of the billings received in the first quarter relate to expenditures that were incurred and accrued during the District's previous year-end.
- The **Operation and Maintenance of Works and Lands Program** includes all operation and maintenance of facilities, flood control and water conservation structures, lands, and other works authorized by Chapter 373, Florida Statutes. Of the \$20.9 million budgeted for this program, the District has obligated 54 percent of the budget (36 percent expended and 18 percent encumbered).
- The **Regulation Program** includes water use permitting, water well construction permitting, water well contractor licensing, environmental resource and surface water management permitting, permit administration, compliance and enforcement, and any delegated regulatory program. Of the \$23.1 million budgeted for this program, the District has obligated 49 percent of the budget (37 percent expended and 12 percent encumbered).
- The **Outreach Program** includes all environmental education activities, such as water conservation campaigns and water resources education; public information activities; all lobbying activities relating to local, regional, state, and federal governmental affairs; and all public relations activities and advertising in any media. Of the \$4.6 million budgeted for this program, the District has obligated 60 percent of the budget (23 percent expended and 37 percent encumbered).

- The **Management and Administration Program** includes executive management, executive support, governing board support, ombudsman, general counsel, inspector general, administrative support (general), procurement, finance, human resources, risk management, and communications. Of the \$16.7 million budgeted for this program, the District has obligated 58 percent of the budget (44 percent expended and 14 percent encumbered).

Based on the financial activities for the six months ended March 31, 2013, the financial condition of the District is positive and budget variances are generally favorable. There are no reported or identified major trends, conditions or variances that warrant additional management attention.
