

Weather Maps

Title: _____ Forecast Date: _____

Student Directions

1. Study an actual weather map and discuss the symbols used and what they mean.
2. Collect information about today's weather using the Internet, newspapers, or other sources.
3. Using the outline of Florida provided, draw today's weather conditions on the map. Be creative and use symbols and colors to represent different types of weather.
4. Develop a legend to help others interpret the symbols and colors on your map.
5. Title the map and include the date of the forecast.
6. Add any other information that would be useful to the reader.
